9:00 AM to 4:00 PM

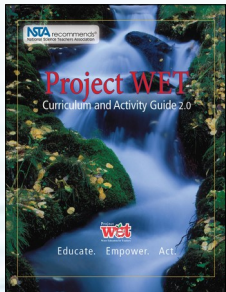

project WET

At the Forest Resource Education Center
495 Don Conner Blvd.
Jackson, New Jersey 08527

WATER EDUCATION TODAY

Project WET: Water Education Today is dedicated to solving critical environmental challenges by teaching the world about water. Project WET does this by providing hands-on, science-based water education resources to educators around the world. These resources encourage responsible environmental stewardship and promote meaningful action to address environmental challenges, climate change, social justice, and sustainability. Creating a water literate society allows our communities to value precious resources and make informed decisions.

This Workshop will be taught in two sessions. Morning Session concentrates on Project WET's **Curriculum and Activity Guide 2.0** from 9:00 AM to 12:30 PM. The Afternoon Session covers **Climate, Water and Resilience** from 1:30 PM to 4:00 PM. Educators are welcome to choose either one or both sessions to participate in.

The Curriculum and Activity Guide 2.0

Understanding global water challenges is crucial in maintaining an ample water supply for all. Water connects all of us, touches every aspect of our lives and is needed for everything to exist. Project WET's *Curriculum and Activity Guide 2.0* provides sixty-four engaging activities demonstrating our relationship to water and how our actions impact everything that needs it. The activities empower students to find local solutions and ensure a sustainable water future.

Climate, Water and Resilience

Understanding climate, specifically the way that it is changing, is crucial to making decisions and building community and environmental resilience. This program guides teachers and students through nine engaging activities that empower them to combat climate change and build a more resilient future.

Project WET activities are designed for grades K through 12 and correlated to:

Essential Principles of Climate Literacy

Contact: Shari Kondrup at skondrup@brickmua.com for registration.

Cost: FREE - includes book for each session and free one year subscription to WETconnect.
